## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claim 25-29, 33-37, 56-64 drawn to an invention nonelected with traverse in action mailed 5/17/2005. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Curtis et al. ("Curtis") (US Patent 6,389,139).

Regarding Claim 1, Curtis discloses an apparatus comprising an audio distribution unit (Fig. 7, 14) having means for providing audio signals from audio sources (6) and output ports for supplying sets of audio transducers, each said set comprising at least a first audio transducer and a second audio transducer (42 and 44) and having associated therewith at least one remote unit (20), the first and second audio transducers and the remote unit being connected to the audio distribution unit by

Art Unit: 2644

a set of four conductors (12, 22, 24, 26), the apparatus further comprising means for supplying audio signals to each of the audio transducers by way of a respective pair of said four conductors (12, 24 and 12, 26) and transferring at least one of power and data signals between said audio distribution unit and said remote unit, by way of at least two of said four conductor (power on 22 and 12 and audio data on 24 and 26).

Regarding Claim 67, Curtis further discloses voice circuitry for converting signals from a microphone into voice signals for transmission to said audio distribution unit and to said transducer units (Col. 5, line 67).

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 66 is rejected under 35 U.S.C. 103(a) as being unpatentable over Curtis as applied to claim 1 above in view of Noro (US Patent 5,297,211).

Curtis discloses a apparatus as stated apropos of claim 1 above but does not disclose an infrared receiver means for receiving an infrared signal from a separate control unit and means for detecting the infrared signal. Noro discloses a distributed audio system with a remote control (Fig. 2, remote 260) that transmits infrared signals to receiver 20. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include a infrared transmitter and receiver in order to

Art Unit: 2644

provide means for adjusting the audio system from a remote location rather than a fixed point for more versatility.

***Allowable Subject Matter***

6. Claims 2-24, 30-32, 38-55, 65, 68-75 are allowed.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
